

“MAY I PLEASE ASK WHY THIS PRODUCT IS NOT NO.1 ON EARTH?”

“May I please ask why this product is not no.1 on Earth? I have been to so many beauty therapists and had hundreds of facials promising value and results for my skin, but it never helped. With this unbelievable beautiful Rinazell Cream, just a 5ml sample has taken my redness away and significantly brought my skin back to normal.”

Jenevieve E, Melbourne

HYDRATAIN®
EMULSION SYSTEM

Peptides are the new buzz word in cosmetics. Research at the National Institutes for Health (USA) has shown that, unlike acids, they **stimulate the natural rebuilding processes** without irritating the skin. Peptides signal cells to start the natural regeneration process. This signal function enables the body to repair damaged skin, produce new collagen fibres and **renew the skin** from ‘inside out’.

Milk peptides have been shown to be particularly effective. Dr. Spiller Rinazell Cream combines the benefits of milk peptides with our unique Hydratain® technology, soothing irritation, ensuring **long lasting hydration** and effective delivery of **bio-active ingredients** into the skin.
